## SUMMARY

Backend-focused Software Developer with strong foundations in Data Structures, OOP, and scalable application design. Experienced in building RESTful APIs using Python (Django/Flask), optimizing SQL queries, and developing efficient multi-user systems. Passionate about writing clean, maintainable, and performance-oriented code for high-availability applications.

## TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, SQL
- **Backend Frameworks:** Django, Flask, Node.js
- **Frontend:** HTML, CSS, JavaScript, React.js
- **Databases:** MySQL, SQLite
- **Tools & Concepts:** Git, GitHub, Postman, REST APIs, OOP, Database Optimization, Authentication

## CORE COMPETENCIES

- Data Structures & Algorithms
- Object-Oriented Programming (OOP)
- REST API Design & Development
- Debugging & Performance Tuning
- Git Version Control & Code Management
- Database Design & Query Optimization

## PROJECTS

### AIVirtualMouse (OpenCV, Python)

- Developed a real-time gesture-based virtual mouse using OpenCV and MediaPipe.
- Implemented hand tracking algorithms for cursor movement and click detection.
- Optimized processing pipeline for smooth and responsive performance.

### Multi-User To-Do Application (Django)

- Designed and developed a scalable multi-user task management system using Django.
- Implemented secure authentication, optimized CRUD operations with efficient SQL queries, and ensured data isolation per user.
- Improved application responsiveness by applying query optimization and structured backend architecture.

### Grocery Store Application (Flask, SQL Workbench)

- Built a backend-driven grocery store application using Flask and relational databases.
- Designed RESTful APIs for product browsing, cart management, and user interactions.
- Optimized database queries and ensured clean routing structure for maintainable code.

### Expense Tracker (Web-based Application)

- Developed REST APIs using Node.js for expense tracking with categorized transaction management
- Implemented structured database schema and optimized queries for handling large transaction records..
- Focused on writing modular, testable backend code to improve maintainability.

## WORK EXPERIENCE

Aug 2025 - Dec 2025

### Freelance

- **Beyond Invitations – E-Commerce Website:** Developed an e-commerce-style wedding card catalog with product displays, filtering options, and a responsive UI.
- **TechInsight – Portfolio Website:** Built a professional portfolio website for the TechInsight freelance team using React.js, featuring a clean UI, component-based architecture, and responsive design.

### Software developer Trainee, Softscholars Technologies

- Worked on machine learning and Python-based modules, focusing on scalability, debugging, and clean code practices.

## EDUCATION

Sep 2020 - July 2024

### B.TechArtificial Intelligence and Data Science

Karpagam Institute of Technology, CGPA 7.75
